

I am asking you not to change Wisconsin's no call list. I am a pharmacist and have to answer phones all day at work. Before, Wisconsin's no call list went into effect, I used to get 10 telemarketing calls a day at my home. I was afraid to answer my phone at home. Now, I have peace when I'm home and can answer phone calls from family and friends without worrying it is a telemarketer. I also used to get calls before 8AM and after 9PM. I don't wish to go back to this. People should not have to have privacy blocking services added to their phones to avoid telemarketing calls. Please do not change our law.

Thanks,

Gail Staub
